

2019-2020 Course Mastery for State-Tested Subjects

Percentage of Students Showing Mastery in Core Courses

■ Semester 1 ■ Semester 2

The 2019-2020 school year posed new challenges for all campuses nationwide, and SRHS was no exception. In March 2020, SRHS switched to all virtual learning. We were still committed to the PLC process during this time. Our collaborative teams still met weekly to discuss data, student needs, and intervention. Although the learning platform changed, the practice of ensuring our students were successful in their learning did not.

The data shows the percentages of students in our state tested subjects that were successful in the course each semester.
