	72.61		176.3		300.3		227.69

This is what our 36 2nd grade ELLs did in their reading comprehension assessment last year. I chose to show you this grade level because they are a reflection of the foundational skill system that has been described in the narrative. In the fall, the kids averaged a lexile of 72.61. Prior to winter break, they averaged 176.3. By year's end, they averaged 300.3. The kids grew an average of 227.69 lexile points. The assessment publisher indicates that 100 points is typical annual growth. Our kids more than doubled that.
