Final Thoughts: Please describe the kind of support you think your team would need in order to improve the overall levels of trust between teachers. (Write "none" if you cannot think of anything at this time.)

26 responses

none

None

I wonder how one responds to these questions when PLCs involve two members vs larger groups. I note this because in a two member group the relationship either works or doesn't whereas in larger groups interpersonal dynamics are just more complicated.

None, our team is great,

If someone borrows materials, he/she needs to return on time and in the same condition as they have received them.

More celebrations and reflections on our trust level.

Understand that we are all professionals and know what we are doing and that we are all working with students' best interest at heart. Be willing and open to involve, listen to and take inputs from all PLC members.
