

Writing Scoreboards to Track Student Growth

Historically, our school has had the greatest difficulty in the area of writing. In 2019-2020, we began utilizing writing scoreboards. Here are some examples of the scoreboards that our teachers utilized. Each week every teacher brought an example of writing from her / his classroom to their collaborative team meetings. The teams discussed the progress of the students and identified the next steps to ensure student progress towards individual and team goals.
